About

Computer Science sophomore at Nile University with hands-on experience in software development, RESTful API design, and relational database systems. Completed a technical internship in a Solutions and Technology department, applying Object-Oriented Programming, SOLID principles, and SQL using Oracle Database. Actively seeking internship or part-time opportunities to apply programming and problem-solving skills in real-world projects. Currently self-studying Data Analysis with strong interest in leveraging data-driven insights to solve practical challenges.

Education

Nile University – Cairo, Egypt

Bachelor of Science in Computer Science and Information Technology

September 2024 – July 2028 | GPA: 2.8

Stanford International School – Cairo, Egypt

High School Diploma

September 2021 – June 2024 | GPA: 3.85

Technical Skills

Programming Languages:

Python, C++, Java

Web Technologies:

HTML, CSS, RESTful APIs

Databases:

SQL, Oracle Database

Tools & Technologies:

Git, GitHub, Spring Boot, IBM Cloud

Core Concepts:

Object-Oriented Programming (OOP), SOLID Principles, File Handling, Data Structures & Algorithms

Internship Experience

Summer Intern – Solutions & Technology Department

Alkan Telecom

- Collaborated using GitHub for version control and team-based development
- Applied OOP and SOLID principles in Java-based application
- Designed and developed RESTful APIs using Spring Boot
- Built dynamic web pages using Thymeleaf
- Performed SQL operations (DDL, DML, joins) using Oracle Databases
- Developed a chatbot Solution on IBM Cloud

Projects

Chemistry Quiz (Python)

GitHub: <https://github.com/Hamzahmad6/Python-Chemistry-Quiz>

- Developed a GUI-based quiz application using Tkinter
- Implemented 10 randomized multiple-choice questions
- Designed score tracking system with user input validation
- Applied clean logic structure and modular coding practices

Library Management System (C++)

GitHub: <https://github.com/Hamzahmad6/LibrarySystemCPP>

- Built a console-based system for managing books and users
- Implemented file handling for persistent data storage
- Applied modular programming and structured design
- Practiced OOP principles and system organization

Tic-Tac-Toe Game (Java)

GitHub: <https://github.com/Hamzahmad6/TicTacToeGame>

- Developed a 2-player console-based game
- Designed clean OOP structure with class separation
- Implemented input validation and win-condition detection
- Focused on code clarity and maintainability

GPA Calculator (C++, HTML/CSS)

- Developed a CLI-based GPA calculator in C++ to compute weighted GPA using credit hours
- Implemented grade-to-point conversion logic and input validation
- Designed a structured algorithm to handle multiple courses dynamically
- Built a web-based version using HTML/CSS for visual presentation and improved user interaction

Certifications & Courses

Programming Fundamentals Diploma – Route Academy

- C++ Basics
- OOP with C++
- Data Structures & Algorithms
- Java Basics
- Database Fundamentals

AI Career Essentials – ALX Africa

Certificate: <https://savanna.alxafrica.com/certificates/sehm2SCPcR>

Activities

Member – ICPC NU Operations & Logistics Team

- Assisted in organizing programming competitions
- Coordinated event logistics and participant management
